PROJECTS

- **Project: Developed an E-commerce website("EazyBuy")**
Tech Stack: Core Java, JSP, Servlet, JDBC, MySQL, HTML, CSS, Bootstrap
This comprehensive eCommerce website, meticulously crafted with Java, CSS, Bootstrap, JDBC, Servlets, and JSP, presents an impressive array of features for both users and administrators. For users, it offers seamless registration and secure login, a user-friendly shopping cart, and a streamlined purchase process. For administrators, it provides exclusive access with admin privileges, enabling them to effortlessly add new products, access customer data, and gain insights into product listings and customer orders. This project serves as a compelling testament to your web development and database management expertise, highlighting the extensive functionality achieved through the implementation of these cutting-edge technologies.
- **Project: Job Portal (Career-Connect)**
Tech Stack: Bootstrap, Core Java, JSP, Servlet, JDBC, MySQL.
Overview:
The Job Portal project is designed to provide a platform for both employers (admin) and job seekers (users) to efficiently connect with each other. Employers can post, manage, and delete job listings, while users can search for jobs based on categories and locations. This platform facilitates the job search and hiring process, making it easier for both parties.
